Dear Theresa,

After trying several forms of therapy to ease the stress and discomfort caused by a long term lower back injury, I have found your treatment to be extremely successful.

Not only has it resulted in a faster recovery from episodes of severe cramp and muscle spasms, I'm in the gym exercising with far greater breadth of movement than I would have expected after just two visits to you.

I will have no hesitation in referring friends and colleagues to you and thank you for your professionalism (even if you did say upon the initial visit that my muscles reminded you of bumpy radiators!)

My kindest,

Neale James
