Dear Theresa

Re: My recent Shoulder & neck problem

This is just a short note to acknowledge the thoroughly professional approach taken by you in resolving my progressively more uncomfortable shoulder and neck problem, which we concluded was probably caused by the bad habit of "holding" the telephone between my right ear and right shoulder whilst working.

I suspect I am not the only person to have caused this self-inflicted injury and would like to confirm that since the remedial treatment and good advice provided, the problem has been rectified and the discomfort removed.

I am grateful to you Theresa and would have no hesitation in recommending you to other people.

Kind Regards

Mike Adams
